Flutter Application Name - Happy Paws GitHub Repository - https://github.com/abichoi/Happy_Paws2

Introduction to Application

It is important for pet owners to keep track of their pet's health. However, it could be difficult as time passes with more and more medical record. This is why an app is needed to keep all the records organized.

In this app the users can store:

1. Pets' Details, which includes vaccine records, medical records, notes and basic information, such as name, breed, date of birth.
 2. Contacts of pet shops, pet hotels, vets, etc.
 3. To-Do List
 4. Appointment, which includes start/ end date and time, name of the appointment, which pet it is for and the location of the appointment
 5. Storage, which includes the name and quantity of the items. Users can set a quantity threshold for alert when the quantity is lower than the threshold
- A Shop Page shows 5 online pet stores. When users tap on the shop cards, a browser will pop up and bring them to the shop.

A bottom navigation bar is used and it can access the Homepage, the To-Do List Page, the Appointment Page, the Storage Page and the Shop Page. The Vaccine Page, the Medical Record Page and the Note Page can be accessed in the Pet Profile Page, which can be access by tapping on the Pets' card in the Homepage.
